# INTRODUCTION

## IMAGE FILE:

 Hunter XP for Dongled v6.E01

On 22<sup>nd</sup> November 2025, the image file of HunterXP was provided by our university as an assignment where we need to examine all the crime committed by the Suspect and to extract all the evidence, we need for investigation. On 10<sup>th</sup> December 2025 7:00 pm, Me (Bibek Pandeya) writing this report after Examining the Hunter image file. In this case, the crime that the Suspects “BOB HUNTER & BILLY RAY” committed was Stalking of two girls “CHRISTINA DETSIWT & her friend SABRINA DEWERCs” and Extortion of obtaining money from Victim’s FATHER. Now, the case-number we assigned for this case was “1101” from the tool “AUTOPSY 4.19.2”

Moreover, to examine the image file we used many open-sourced forensics tools like:

1. Autopsy 4.19.2
2. AccessData FTK Imager 4.7.1.2
3. AccessData Registry Viewer 1.8.0.5.
4. Reg Ripper 3.0
5. Arsenal Image Mounter 3.9.239
6. Gkape 1.3.0.2

To begin with, I started this investigation on 24<sup>th</sup> November 12:30 PM, the first task I did was mounting the image file in AccessData FTK Imager and verify the “Hash” of the evidence file. We need to do HASH verification to ensure that the image file is not changed or altered during the verification. We can see below “MD5 & SHA1” HASH value of HunterXP Image file which is generated by AccessData FTK Imager.

| Verification hashes   |                                          |
|-----------------------|------------------------------------------|
| MD5                   | dfcfe9ab9a60c6ad4a314656b687226b         |
| MD5 verification hash | dfcfe9ab9a60c6ad4a314656b687226b         |
| SHA1                  | 1a50a99391857402131b10299fa318a130a603b0 |

Please see **Appendix 1** for provenance of this information.

# EXAMINATION SUMMARY

To begin with, the image file “hunter xp” was examined from 11/24/2024 to 11/30/2024. It should be noted that I have done a lot of examinations on this image and found a lot of evidence for example, On 24<sup>th</sup> November 2024 at 1:45 Pm I have found evidence of stalking and clicking victim’s photo without permission. In the Image we can see a reflex of suspect while clicking Victim’s photo. Please see **Appendix 2** for provenance of this information. On 25<sup>th</sup> November 2024 at 12:05 Pm I have also found files whose Extension are changed or Extension mismatch files I found this by applying “Extension mismatch detection” in run ingest module. The file extension is tempered because the name of the file is “.tmp” however, Hex computation is “47 49 46 38” which is of Gif File. Please see **Appendix 3** for provenance of this information. On 28<sup>th</sup> November 2024 at 2:35 Pm I found the details about research done by the suspect about wiping tools or Anti-forensics tool “BC WIPE” and the “BEST CRYPT v7” moreover, the suspect also used a software for cleaning disk which we found in prefetch file called “cleanmgr.exe”. These tools are used to erase data from the disks. Please see **Appendix 4** for provenance of this information. Afterwards, On 30<sup>th</sup> November at 8:15 PM I found that the suspect operated the CD/DVD burning software “imapi.exe” after the shutdown time. I got the information using two forensics software “ARSENAL IMAGE MOUNTER & GKAPE”. I gathered the information from the Program execution file which is exported from Gkape. The shutdown time was “2002-06-04 22:58:42 UTC” however the Imapi software was operated on “2002-06-05 12:40:02 UTC” which clearly shows that the activity is done after shutdown. Please see **Appendix 5** for provenance of **this information**.

## SYSTEM PROFILING

System profiling is conducted to gather information about what operating system the user is working on, how many users are there on the computer, details of the user and where the crime is executing from. To know all these information, we need to examine TimeZone, User Details & Operating System Details. On 24<sup>th</sup> November at 2:45Pm I found this information from the Files “SAM, SYSTEM and SOFTWARE” Using forensics tools “Autopsy and Registry Viewer”.

### 1. Operating System Details

Operating systems play a vital role to run the computer where it manages hardware resources and provides services for computer programs and allows user interaction. To gather information about operating systems we need to examine the SOFTWARE file. I

gathered the information using Autopsy and Registry Viewer tool. We can see the OS information of suspect below:

| Operating system information (System Artefacts) |                         |
|-------------------------------------------------|-------------------------|
| Product name                                    | Microsoft Windows XP    |
| Product ID                                      | 55277-005-6418583-21673 |
| Current Version                                 | 5.1                     |
| Registered Owner                                | PC User                 |
| Registered Organization                         | PC User Company         |
| Install Date                                    | 2002-02-28 22:02:39     |
| Shutdown Time                                   | 2002-06-04 22:58:42     |

Please see **Appendix 6** for provenance of this information.

## 2. User details

Examining User details means we can gather Information relating to “Username, Account created time & last login date. On 24<sup>th</sup> November at 2:40 Pm I examined the SAM file Using Autopsy and Registry Viewer as a result, I found 3 default user information and 1 Suspect information (BOB HUNTER).

| Users account information |                             |
|---------------------------|-----------------------------|
| Username                  | Bob hunter                  |
| Account created           | Thu, feb-28 22:22:17 2002 Z |
| Last Login Date           | Tue Jun 4 23:01:54 2002 Z   |

Please see **Appendix 7** for provenance of this information.

## 3. TimeZone

Examining TimeZone gives us Important information to know where suspect is executing the crime from. On 24<sup>th</sup> November at 2:45 Pm I examined the SYSTEM file using the tool Autopsy and Registry viewer as a result I found that the suspect executed the crime from

North America (Central Standard Time). Please see **Appendix 8** for provenance of this information.

## FILE SYSTEM ANALYSIS

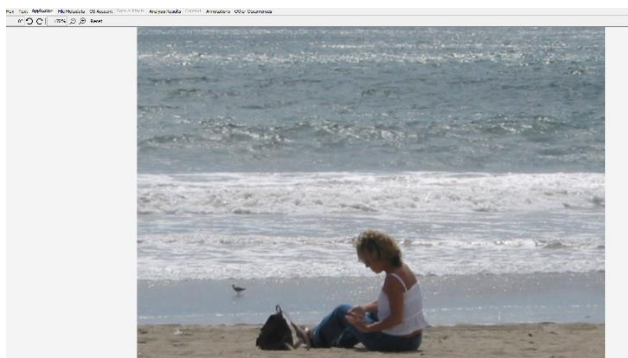

On 26<sup>th</sup> November at 4:45 Pm I started Examining the File System & File types of the Image file “hunter xp”. As a result, in the Primary file system (vol.2) was NTFS/exFAT. NTFS/exFAT are the files used to store data in hard disk, SSD & USB drives. Please see **Appendix 9** for provenance of this information. Moreover, after examining I have found a lot of file types like. .Doc file, .htm file, .lnk files & .exe file. Among them .exe file is this type of file which contains information about installed application or program. Please see **Appendix 10** for provenance of this information.

Afterwards, I also found a lot of files that were deleted using run ingest module and selecting file PhotoRec Carver option. Please see **Appendix 11** for provenance of this information.

## Forensic Analysis and Findings

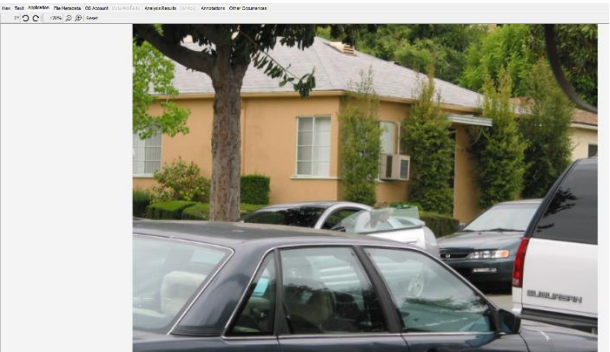

To begin with, As I Examined the image file from 11/24/2024 to 11/30/2024 I have found core evidence like photos clicked by suspect while stalking. Below are the images:

Fig.11

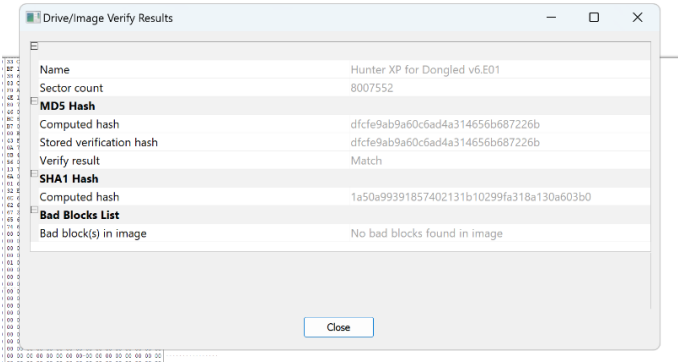

## Conclusion

Finally, after examining the image file “hunter xp” I have gathered a lot of findings as already mentioned above. In conclusion, the suspect first installed the operating system “windows XP” then he used “Canon PowerShot G2” Camera to stalk the girls “Christina & Sabrina” after then they gather information about Victim’s Father and mailed him for ransomware demand. Afterwards, he used an anti-forensics tool to wipe disks then we can see the CD/DVD burning tool “IMAPI” used by suspect after being shut down. All evidence was gathered with double examination using all Open-sourced tool mentioned above. As a result, I can say the suspect’s “bob hunter” and “Billyray” were involved in Crimes like “stalking the girls”, “Extortion” & “Evidence Tempering”. Finally, with the help of the entire report the law must take action against the suspects and give appropriate justice to the victims.
